JOURNAL OF APPLIED MECHANICS AND TECHNICAL PHYSICS
Volume 32, Numbers 1-6, 1991
(A translation of *Prikladnaya Mekhanika i Tekhnicheskaya Fizika*)
Engl./Russ.

Volume 32, Number 1, January-February, 1991

Current-Density Distribution in the Beam of an ARC Proton Source - V. N. Getmanov	1	3
Time-of-Flight Probing of a Plasma Jet in a Magnetic Field - V. I. Batkin and O. Ya. Savchenko	6	8
Faraday Dark Space for a Discharge in Helium - A. I. Ivanchenko and A. É. Medvedev	9	12
MHD Deceleration and Heat Transfer for a Sphere in a Supersonic Flow of Partially Ionized Gas - V. V. Gubin and V. A. Shuvalov	12	15
Efficiency and Conductor Heating in a Multistage Induction Accelerator - T. G. Vlasova and S. R. Petrov	16	19
Near Field of Internal Gravity Waves Excited by a Source in a Moving Stratified Liquid - V. V. Bulatov and Yu. V. Vladimirov	21	24
Occurrence of Thermocapillary Convection in a Cylindrical Layer with Different Methods of Heating - E. A. Ryabitskii	25	28
Numerical Study of Steady-State Regimes of Rotational-Gravitational Convection - N. V. Petrovskaya, A. K. Fadeev, and V. I. Yudovich	31	35
Use of a Three-Component Model to Compute Gas Suspension Flow and Rarefied Flow over Bodies - N. Zh. Dzhaichibekov and S. K. Matveev	35	39
Nonself-Similar Jet of a Non-Newtonian Liquid - A. V. Soldatkin	38	42
Investigation of Breakup of Gas Bubbles and Its Effect on the Structure of Moderate-Intensity Solitary Pressure Waves in a Liquid with Gas Bubbles - V. E. Dontsov and P. G. Markov	41	45
Linear Evolution of Perturbations in Boundary Layers with a Velocity Profile Inflection - M. B. Zel'man and B. V. Smorodskii	46	50
Computing the Compressible Laminar Boundary Layer on a Sharp Body of Bielliptic Section - V. N. Vetlutskii	51	55
Turbulent Incompressible Fluid Flow in a Channel with Unilateral Mass Transfer - Sh. A. Ershin, U. K. Zhapbasbaev, T. B. Kozhakhmetov, and A. V. Smol'yaninov	57	62
Exact Solutions of the Problem of the Motion of the Interface between Immiscible Fluids in a Porous Medium - V. V. Voinov	64	68
Nonsteady Thermal Convection in a Horizontal Cylinder with a Nonuniform Distribution of the Temperature of the Boundaries - B. G. Petrazhitskii and N. M. Stankevich	67	71
Radial Instability of One- and Two-Layer Cylindrical Shells during Impulsive Compression - A. I. Abakumov, S. K. Zhabitskii, and S. A. Novikov	73	77
Solutions, with a Degenerate Hodograph, of Quasisteady Equations of the Theory of Plasticity with the Von Mises Yield Condition - S. V. Meleshko	77	82
Thermoelastic Stresses in a Plane with a Circular Inclusion in the Presence of a Thermal Spot of Elliptical Shape - L. G. Smirnov and I. I. Fedik	84	88
Vibrations of an Elastic Orthotropic Layer with a Cavity - A. O. Vatul'yan and A. Ya. Katsevich	90	95
Plastic Macrodeformation with Twisting under Pressure for Aluminum with Locally Introduced Graphite Powder - V. V. Neverov	93	98
Boundary Value Problems of Elasticity Theory for Plane Domains with One-Dimensional Elastic Reinforcements - S. E. Mikhailov and I. V. Namestnikova	98	103
Prediction of Fracture of a Fibrous Composite by the Numerical Experiment Method - I. N. Zhdanova and D. N. Karpinskii	109	114

	Engl.	Russ.
Effective Moduli of Multiphase Matrix Composites - P. G. Krzhechkovskii	115	120
Determination of the Supporting Capacity of Layered Composite Shells Operating under Cyclic Loading Conditions - É. S. Sibgatullin and I. G. Teregulov	121	126
Approximate Analysis of the Thermal Operating Regime of a Chamber for Treating Materials with Thermal Energy - P. L. Abiduev and V. M. Kornev	125	130
Numerical Calculation of Thermoelastic Stresses in Chambers for Detonating a Gas Mixture - P. L. Abiduev and V. I. Manzhalei	126	131
Thermocouple Measurement of Metal Temperature under Pulsed Deformation Conditions - S. N. Ishutkin, G. E. Kuz'min, and V. V. Pai	131	137
The Mercury Electroporometry Method - S. P. Glushko, V. V. Kadet, and N. S. Rostovskii	138	143
Kinetics of Isothermal Homogeneous Nucleation in a Quasi-Chemical Model - Yu. E. Gorbachev and V. Yu. Kruglov	142	146

Volume 32, Number 2, March-April, 1991

	Engl.	Russ.
Effects of Nonequilibrium of the Plasma of a Vapor Aureole in an Intense Radiation Field - A. G. Lesskis, A. K. Titov, and A. A. Yushkanov	147	3
Destruction of Thin Films and Foils by Continuous Spectrum Radiation - É. K. Anderzhanov, S. Yu. Volokhovich, I. I. Divnov, and N. I. Zotov	151	8
Character of Fracture and Filtration Properties of a Fluid-Saturated Porous Medium in an Underground Explosion - A. N. Bovt, E. E. Lovetskii, A. M. Maslennikov, N. S. Rostovskii, V. I. Selyakov, and E. A. Shurygin	155	12
Shape of an Incompressible, Weakly Conducting Jet in a Strong Electric Field - A. A. Shutov	162	20
Determining Velocities of Bodies Moving in a Viscous Liquid under the Action of Electromagnetic Forces - V. I. Khonichev	167	25
Motion of Bodies in a Granular Bed - A. S. Ivanov, S. D. Lyubarskii, and S. P. Khurs	169	27
Active Resonator as a Dynamic Absorber of Acoustic Vibrations in a Bounded Volume - V. B. Kurzin	172	30
Initiation of Coherent Motion in Turbulent Cocurrent Flows - O. A. Likhachev	177	36
Evolution and Interaction of Three-Dimensional Vortex Clusters - G. A. Kuz'min	184	44
Nonlinear Effects of the Ekman Layer on the Dynamics of Large-Scale Eddies in Shallow Water - S. N. Aristov and P. G. Frik	189	49
Slow Motions of a Solid in a Continuously Stratified Fluid - V. A. Vladimirov and K. I. Il'in	194	55
Effect of an Inflection in the Profile of Mean Velocity on the Resonance Interaction of Perturbations in a Boundary Layer - M. B. Zel'man and B. V. Smorodskii	200	61
Longitudinal Vortex Structures and Heat Transfer in the Region of Attachment of a Supersonic Turbulent Boundary Layer - E. G. Zaulichnyi and V. M. Trofimov	204	66
Stability of Two-Dimensional Traveling Waves on a Vertically Draining Liquid Film to Three-Dimensional Perturbations - Yu. Ya. Trifonov	210	72
Waves on the Surface of a Liquid Film Flowing around a Horizontal Cylinder - M. V. Izvekov and V. A. Mukhin	215	77
Thermal Oscillation Convection in a Layer of Liquid with Weightlessness or Reduced Gravitation - S. M. Zen'kovskaya and S. N. Ovchinnikova	221	84
Alignment of Hollow Microspheres - L. K. Antanovskii and G. B. Volkova	227	90
Spreading of a Boundary Jet in a Counter Flow - V. P. Lebedev, M. I. Nizovtsev, and V. I. Terekhov	231	95
Computation of Flow over a Spherically Blunted Cone for Various Shock Layer and Surface Blowing Conditions - A. V. Bureev and V. I. Zinchenko	236	100

Dynamics of Low-Amplitude Pulse Waves in Vapor-Gas-Drop Systems - D. A. Gubaidullin and A. I. Ivandaev 240 106
A Statement of the Problem of Thermal Diagnostics for a "Protective" Layer - V. A. Lomazov 247 113
Reconstructive Tomography with Weak Optical Anisotropy - A. É. Puro 252 119
Dynamic Ductility Peak with High-Velocity Failure of Metal Shells - S. P. Kiselev 255 122
Elastoplastic Torsion Theory for Whisker Crystals - I. L. Bataronov and A. M. Roshchupkin 259 127
Numerical Studies of Nonlinear Wave Processes in a Liquid and a Deformable Solid during High-Speed Impact Interaction - V. A. Petushkov 265 134
Transmitted Waves and the Dynamic Edge Effect in an Anisotropic Strip. (Comparison with Experimental Data) - A. G. Demeshkin and V. M. Kornev 274 144
Dynamic Formation of a Block of Elastic Material - N. S. Astapov and V. M. Kornev 281 149
Analysis of Creep in a Rectangular Plate with a Circular Orifice under Tension - V. N. Solodovnikov 284 153
Fracture Failure in the Alloy AMg6 - S. A. Novikov and A. I. Ruzanov 288 158
Stability of the Motion of Metal Plates Driven by the Grazing Detonation of a Flat Charge - A. N. Borisov, S. M. Vasil'ev, V. I. Kirko, and I. N. Kirko 292 162

Volume 32, Number 3, May-June, 1991

Some Self-Focusing Mechanisms for Absorption on Rotational Transitions - V. V. Zhuravlev and A. M. Starik 297 3
Radiation Contamination of Dielectrics Irradiated with a Fast-Electron Flux - V. N. Gusel'nikov, K. A. Dergobuzov, and A. P. Yalovets 305 11
Intensified Directivity of Gas Dispersal as a Result of Radiation Energy Loss - I. V. Nemchinov and A. I. Yurchenko 311 17
Localized Explosion in a Material with a Magnetic Field and the Consequences of Finite Conductivity in a Magnetohydrodynamic Model - A. M. Bergel'son, Yu. P. Raizer, and S. T. Surzhikov 316 22
Instability of a Liquid Surface with Laser Heating - V. N. Alekseev, K. A. Naugol'nykh, and S. A. Rybak 322 28
Electric-Current-Induced Restructuring of the Porous Space in a Medium - I. G. Abdul'manov, V. I. Ermakov, N. S. Rostovskii, A. D. Rybakov, A. E. Popov, and V. I. Selyakov 328 35
High-Speed Asymptotic Form of the Wave Resistance of Bodies in a Uniformly Stratified Liquid - V. A. Gorodtsov 331 37
Onset of Coherent Large-Scale Motion in a Plane Turbulent Wake - O. B. Budneva and O. A. Likhachev 337 44
Generation of Dissipation-Gravity Waves during Thermal Convection in a Stratified Medium - A. V. Kistovich and Yu. D. Chashechkin 342 49
Propagation of Plane Surface Waves over an Underwater Obstacle and a Submerged Plate - I. V. Sturova 348 55
Mixed Convection around a Circular Cylinder in a Hele-Shaw Cell - S. A. Safonov 356 62
Effects from Turbulence Intensity on Slot Protection Performance - V. P. Lebedev, V. V. Lemanov, S. Ya. Misyura, and V. I. Terekhov 360 66
Investigation of Transition from Subcritical to Supercritical Regime of Viscous-Inviscid Interaction in the Wake Behind a Flat Plate - A. A. Kovalenko and I. I. Lipatov 365 72
Numerical Simulation of Effects of Generation of Solitons Moving a Region of Surface Pressure - B. E. Protopopov 371 78
Surfacing of a Heavy Sphere in Vibrating Sand - B. V. Levin 377 85
Motion of a Chain of Bubbles in a Vertical Channel with a Viscous Fluid - P. K. Volkov 379 87

	Engl.	Russ.
Stability of an Adiabatic Continuous Chemical Reactor - T. A. Bodnar'	383	91
Study of Two-Layer Flow of Viscoelastic Molten Polymers in Axisymmetrical Channels - A. R. Davydov, V. M. Levin, V. P. Pervadchuk, and N. M. Trufanova	390	97
Resonant Excitation of Waves in a Heavy Liquid beneath a Viscoelastic Plate - A. V. Marchenko	395	101
Thermophoretic Motion of an Ensemble of Moderately Coarse Aerosol Particles - M. A. Gaidukov, V. A. Kostruba, and A. V. Terzyan	402	109
Thermocapillary Convection with Temperature-Dependent Heat Release at an Interface - A. Yu. Gilev, A. A. Nepomnyashchii, and I. B. Simanovskii	408	115
Thermal Conductivity of Homogeneous Mixtures - V. I. Loginov and V. G. Kucherov	413	120
Dynamic Contact Problem for a Two-Layer Half-Space with a Spherical Cavity - A. A. Lyapin, A. N. Rumyantsev, and M. G. Seleznev	418	125
Rotational Component of an Elastic Wave Field in the Near Zone of a Point Source on the Surface - V. A. Kozlov, V. M. Matveev, N. V. Pet'kin, and D. N. Romashko	423	130
Numerical Study of a Model of Fatigue Wear and Fracture - I. I. Kudish	427	134
Buckling of a Nonlinearly Elastic Slab Lying on the Surface of a Liquid with Allowance for Phase Transformation - V. A. Eremeev	433	141
Beginning of Plastic Yielding in a Stress Concentration Zone - M. A. Legan	439	147
Instability of Elastoplastic Plane Flows - G. A. Korolev	444	152
Modeling the Action of Secondary Flows on the Mixing Process in a Channel - V. I. Vasil'ev and S. N. Zakotenko	449	156
Mössbauer Studies of Uniaxially Loaded Ferromagnetic Samples - V. P. Larionov and Ya. S. Semenov	453	161
Spectral Composition of Light Scattered in Fluid Flow around a Rotating Disk - V. A. Bazanov, N. A. Rubtsov, and V. P. Solov'ev	456	164
Flow Diagnostics in a Cryogenic Wind Tunnel - S. Yu. Borisov, A. L. Iskra, V. P. Kulesh, and A. M. Naumov	461	169

Volume 32, Number 4, July-August, 1991

	Engl.	Russ.
Structure of Hydrogen Compression Plasma Flows in a Magnetoplasma Compressor - S. I. Ananin	465	3
Effect of Branching Processes on the Glow of the Discharge Channel during Breakdown in a Highly Nonuniform Field - M. F. Danilov	472	10
Magnetoacoustic Shock Waves in a Nonuniform Plasma Flow - V. A. Pavlov	475	13
Electric Field Buildup in Pore Collapse - V. V. Surkov	481	19
Cavitation Dynamics in Reflection of a Compression Pulse from the Interface of Two Media - G. I. Kanel' and A. V. Utkin	484	23
Diffusion Kinetics with Crystal Growth from the Gas Phase - S. I. Alad'ev	487	26
Nonstationary Motion of Drops under the Action of Capillary and Mass Forces - A. E. Rednikov and Yu. S. Ryazantsev	490	28
Rising of a Bubble in an Upward Fluid Flow in a Vertical Pipe - P. K. Volkov	496	35
Three-Dimensional Structure of Flow in a Supersonic Underexpanded Jet - V. I. Zapryagaev and A. V. Solotchin	503	42
Improving Supersonic Flow around Bodies by Means of Gas Jets Containing Particles - N. P. Gridnev	508	47
Oscillatory Interaction between an Underexpanded Jet and an Obstacle in the Presence of a Supersonic Sheathed Flow - G. F. Gorshkov, V. N. Uskov, and A. P. Ushakov	512	50
Inverse Feedback Mechanism in Self-Oscillations in Flow of an Underexpanded Supersonic Jet against a Planar Obstacle - V. N. Glaznev	519	59
Wavefront Propagation Theory for a Nonlinear Layered Medium - M. A. Guzev	523	63

	Engl./Russ.	
Internal Waves in a Pycnocline for a Wing Moving over a Barrier - V. I. Bukreev, N. V. Gavrilov, and A. V. Gusev	528	68
Wave Propagation in Three-Phase Mixtures of a Gas with Particles and Liquid Drops - T. R. Amanbaev and A. I. Ivandaev	534	74
Analytical and Numerical Investigation of the Three-Dimensional Viscous Shock-Layer on Blunt Solids - I. G. Brykina, V. V. Rusakov, and V. G. Shcherbak	540	81
Stability of a Viscous Compressible Shear Layer with a Temperature Gradient - A. N. Kudryavtsev and A. S. Solov'ev	547	88
Invariant Solutions of Viscoplasticity Equations and Solution of the Problem of Helical Motion of a Bingham Fluid between Coaxial Cylinders - S. I. Senashev and V. A. Chugunov	554	95
Regarding the Article by B. A. Lugovtsov "Determination of the Main Flow Parameters in a Swirl Sprayer by means of Conservation Laws" [1] - G. Yu. Stepanov	560	102
Principle of Maximum Discharge - B. A. Lugovtsov	563	105
Experimental Study of the Structure and Mass Transfer of a Turbulent Vortex Ring - Yu. S. Rusakov	565	107
Effective Diffusion of Multicomponent Mixtures in Multidimensional Flows - A. I. Moshinskii	571	113
Effect of Excitation of Internal Degrees of Freedom in Clusters on Condensation Kinetics - A. L. Itkin and E. G. Kolesnichenko	578	120
A Multimolecular Condensation Model and an Analytical Method for Its Solution - A. L. Itkin and E. G. Kolesnichenko	580	122
Theory of Electrodiffusion Measurements of Friction in Microdispersed Liquids. Diffusion Layer Approximation - O. Vain	582	123
Thermal Instability of a Shear Flow in the Annular Channel - T. A. Bodnar'	586	127
Modeling Thermal Processes in the Shock Loading of Porous Materials - A. I. Byvshikh, V. I. Kirko, and N. I. Pak	592	133
Numerical Modeling of the Thermal Removal of Burrs by Concentrated Energy Flow - N. I. Pak and S. A. Shikunov	596	137
Coupled Heat Transfer in a Composite Material - A. M. Grishin, A. N. Golovanov, and A. S. Yakimov	600	141
Reflection of a Shock Wave from the Free Surface of an Elastoplastic Body - V. A. Baskakov and A. V. Bobryashov	607	148
Shock-Wave Failure of a Wound Glass-Fiber-Reinforced Plastic in Different Directions - A. G. Ivanov, M. A. Syrunin, and V. I. Luchinin	616	157
Analysis of the Nonlinear Deformation of Composites with Allowance for Finite Rotations of Structural Elements - B. S. Reznikov	620	161
One Approach to the Construction of Constitutive Equations in Creep Theory - V. P. Golub	625	166
Energy Variant of the Uniaxial Theory of Creep and Rupture Strength - V. P. Radchenko	632	172
Determination of the Quenching Stresses in Prismatic Specimens by the Method of Integral Photoelasticity - A. É. Puro	641	179

Volume 32, Number 5, September-October, 1991

Features of Axisymmetrical Plasma Flows in a Narrow Flux Tube - K. P. Gorshenin	645	3
Focusing of a Plasma Jet from an Arc Plasma Generator by a Longitudinal Magnetic Field - V. I. Batkin	653	11
Partial Population Inversion in Electron Levels of Diatomic Molecules upon Resonant Action of IR Radiation - V. A. Agafonov	657	15
Limiting Regimes of Conductor Acceleration by Electromagnetic Forces - S. A. Kalikhman	661	18

Generalized Empirical Laws of Starting Discontinuity Dynamics Associated with the Startup of Underexpanded Jets - A. V. Emel'yanov and A. V. Eremin	665	22
Shock Waves in Polydisperse Bubbly Media with Dissipation - S. L. Gavrilyuk and S. A. Fil'ko	669	26
Steady Motion of a Stratified Fluid over a Rough Bottom - V. V. Bulatov	678	34
Propagation of Plane Surface Waves over a Rectangular Step with Overhang and over a Partially Capped Rectangular Trench - I. V. Sturova	684	40
Finding Ship Propeller Profiles with the Least Critical Cavitation Number - É. L. Amromin, A. V. Vasil'ev, and E. Ya. Semionicheva	692	47
Nonsteady Flows of an Incompressible Viscous Fluid with Memory in Cylindrical Tubes - A. D. Khon'kin	697	52
Effect of Instability of Boundary Layer Detachment - V. A. Gudkov	703	57
Numerical Investigation of Nonuniform Flow around a Sphere within the Framework of the Model of a Viscous Shock Layer - N. N. Pilyugin and R. F. Talipov	707	62
Calculation of the Motion of a Rotor in a Cylindrical Chamber - O. N. Dement'ev and V. A. Makhova	713	68
Motion of a Bed Load - P. G. Petrov	717	72
Stratification of an Equidense Suspension of Brownian Particles in Poiseuille Flows - Yu. A. Buevich	722	76
Experimental Study of the Interaction of Pressure Waves of Moderate Intensity in a Liquid with Gas Bubbles - V. E. Dontsov and P. G. Markov	729	83
Experimental Investigation of Drop Fragmentation by Aerodynamic Forces - V. V. Dubrovskii, A. M. Podvysotskii, and A. A. Shraiber	734	87
Apparatus for Investigating the Liquid-Nitrogen Distribution in the Spray Cone of a Jet Flowing out of a Nozzle into an Air Flow - A. S. Bushmin, A. A. Galenko, and L. M. Dmitriev	740	93
Formulation of Problems with Moving Phase-Transition Boundaries in Hydrothermal Strata - A. M. Maksimov and G. G. Tsypkin	744	98
Finite Propagation Velocity and Local Perturbations in Nonlinear Relaxation Filtration - U. G. Abdullaev	750	102
Features of the Pressure–Attenuation Curve in Relaxation Filtration of a Fluid - O. Yu. Dinariev	754	106
Optimal Control in One-Dimensional Elastic-Plastic Models - A. M. Khludnev	760	112
Theory of Plastic Deformation for Multicomponent Porous Media - A. V. Krivko and A. Yu. Smyslov	763	115
Theory of Elastic-Plastic Deformation of Randomly Reinforced Composite Materials - I. S. Makarova and L. A. Saraev	768	120
Stability of a Viscoelastic Rod with a Sporadic Longitudinal Load - A. D. Drozdov and V. B. Kolmanovskii	772	124
Shell Theory Based on Invariants - V. V. Kuznetsov	779	131
Thin Elastic Periodic Plates with Unilateral Internal Contacts - A. G. Kolpakov	784	136
Optimization of the Structure of a Vibration Shield under the Influence of a Concentrated Harmonic Load - K. S. Adamova and M. A. Kasnibolotskii	790	142
Plastic Deformation of an Isotropically Strain-Hardening Polycrystalline Material - O. A. Volokhovskaya and V. V. Podalkov	796	148
Dynamic Damage and Fracture of a Plate with the Expansion of a Gas Cavity in Water - S. P. Kiselev and A. P. Trunev	802	154
Penetration of a Rigid Cone into a Plastic Orthotropic Half Space - A. G. Akopyan	808	159
Calculation of Wear for a Plain Bearing with a Thin Porous Elastic Shell - E. V. Kovalenko	814	163

Volume 32, Number 6, November-December, 1991

Diffusion Description of Vibrational Relaxation in a Binary Mixture of Diatomic Molecules as Quantum Anharmonic Oscillators – Results of a Calculation - O. V. Skrebkov	821	3
A Gas Ejector System and a Differential Ejector - V. A. Malanichev	828	10
Dynamic Strain of a Conducting Half Space with a Cavity in a Strong Magnetic Field - L. A. Fil'shtinskii and L. I. Fomenko	833	16
Transmission of a Pressure Pulse to Metallic and Dielectric Targets Irradiated by a Neodymium Laser in the Free Generation Regime - L. I. Kuznetsov	837	20
Shock Wave Front from an Underground Explosion - N. I. Shishkin	841	23
Operating Regime of an Explosive Magnetic Field Compression Generator with a Capacitive Load with a Consideration of Magnetic Flux Losses - A. B. Prishchepenko and M. V. Shchelkachev	848	31
Wave Motions of a Fluid due to a Moving System of Pressures on an Inclined Bottom - A. N. Bestuzheva and A. A. Dorfman	855	38
Boundary of Monotonic and Oscillatory Convective Stability of a Horizontal Fluid Layer - V. I. Yudovich	861	44
Three-Dimensional Bent-Gravity Waves with Nonuniform Compression - A. E. Bukatov, V. V. Zharkov, and D. D. Zav'yalov	867	51
Annular Capillary Waves - S. L. Zhbankova	873	57
Influence of Capillary Forces on the Nonstationary Fall of a Drop in an Unbounded Fluid - L. K. Antanovskii	875	60
The Koenig Force in a Compressible Fluid - A. A. Doinikov and S. T. Zabtrak	880	65
Numerical Investigation of the Stability of the Equilibrium of a Cylindrical Layer of Fluid with Internal Heat Sources - E. A. Ryabitskii	883	67
Calculation of the Flow Field Past Spherically Blunted Cones near the Plane of Symmetry for Various Shock Layer Flow Regimes with Insufflation of Gas from the Surface - A. V. Bureev and V. I. Zinchenko	887	72
Influence of Rarefaction on the Unsteady Impingement Process of an Underexpanded Supersonic Jet onto a Perpendicular Obstacle - A. V. Savin, E. I. Sokolov, V. S. Favorskii, and I. V. Shatalov	893	78
Closure of the Equations of Turbulence Using the Analytic and Scaling Properties of the Spectral Functions - S. R. Bogdanov	897	83
Experimental Study of the Deformation and Fracture of Circular Aluminum Plates under the Influence of a Shock Wave - L. E. Kolegov, É. É. Lin, V. T. Ryazanov, and A. I. Funtikov	906	93
Growth of Disturbances in a Supersonic Boundary Layer - S. A. Gaponov	910	98
Features of Separated Supersonic Flow Pulsations ahead of a Spike-Tipped Cylinder - V. I. Zapryagaev and S. G. Mironov	913	101
Numerical Modeling of Jet Flow in a Slot Channel in the Transition Regime - S. A. Safonov	920	108
Model of the Clogging of Channels When Polymerizing Liquids Flow through Them - Yu. V. Kokotov and M. O. Stoyanovskii	924	112
Solution of the Planar Linear Filtration Problem in Layered Soils - S. E. Kholodovskii	931	119
Transport Processes in Multicomponent Gas–Liquid Mixtures - É. G. Aznakaev	934	122
Criterion of the Validity of Strain Relations of Thin Shells in the Region of Arbitrary Displacements - V. V. Kuznetsov and Yu. V. Soinikov	940	128
Approximate Solution of a Problem on the Dynamics of a Buried Cylindrical Shell Subjected to a Live Load - R. G. Yakupov	945	133
Theory of Inelastic Strain Based on Nonequilibrium of the State of the Material - É. I. Blinov and K. N. Rusinko	950	138

	Engl.	Russ.
Some Effects of the Biaxial Tension of an Elastic Plate with a Crack - A. V. Boiko	955	142
Pseudo-Macrocrack with a "Quasi-Plastic" Crack-Opening-Load Law - V. V. Tvardovskii	960	147
Physical Causes and Mechanisms of the Formation of Boundary Regions in the Two-Dimensional Explosive Compaction of Powdered Materials - N. A. Kostyukov	967	154
